[X] The use of a compression algorithm on trace data is known. The inventor has not been able to identify a commercial product implementing such a technique, but believes that there are commercial products that use a fixed compression algorithm on trace data. Any such technique stands in contrast to the claimed dynamic selection of a compression algorithm for trace data. For example, claim 1 recites "a plurality of compression modules" and "a compression selector module", components that are not shown or suggested by the use of a static compression algorithm on trace data.

It is respectfully requested that the Examiner consider the above-noted information and return an initialed copy of the attached Form PTO/SB/08A to the undersigned.
